

Final Project Ideas

Boyan Sun

Idea 1: Let's go fishing!

A game inspired by Cat Goes Fishing,

[https://cat-goes-fishing.fandom.com/wiki/Cat Goes Fishing Wiki](https://cat-goes-fishing.fandom.com/wiki/Cat_Goes_Fishing_Wiki)

and Fishing Planet.

[https://wiki.fishingplanet.com/Main page](https://wiki.fishingplanet.com/Main_page)

Relaxing game, fast pace but easy to play, with progression mechanics.

Additional libraries not needed; mainly using logic, loops and images manipulation.

Interacted through key presses and mouse clicks, controlling the character to perform different actions and directing through different UI's.

LET'S GO FISHING

Idea 2: Custom Sneakers Mock Up Tool

Project inspired by <https://www.youtube.com/watch?v=0V7JVNY0Ldk>

Creating mock ups can be confusing because you can only look at one side of the shoe.

A customizable 3D model could help visualizing what the product would look like.

Also inspired by <https://stockx.com/nike-air-force-1-low-white-07>

To load 3D models, <https://p5js.org/reference/#/p5/loadModel>

3D objects: <https://p5js.org/examples/3d-geometries.html>

Idea 3: Bread Run!

Inspired by <https://www.youtube.com/watch?v=zRDhiN50Vo0>

And also the Ads everyone knows about.

I've always wanted to try this game, but have never had the chance, so might as well make it myself...

Theme inspired by <https://www.pinterest.com/1alexoooo/breaddog/>

Libraries not needed; mainly using images and text manipulation, logic similar to my Midterm project, a 3D looking runway with objects moving along it.
